Interface principal

Interface d'indexation

The screenshot displays the QAnswer web application interface. The top navigation bar includes a 'QAnswer' logo, a toggle switch, and several menu items: DATA, SEARCH, CHAT, DATA EXTRACTOR, LOGS, CONFIG, ACCESS, and INTEGRATIONS. A left sidebar contains navigation links for Home, Instant Playgrounds (with sub-links for Document, Chatbot, and Knowledge Graph), Profile, Doc, and About. The main content area is titled 'Campus region numérique (3649)' and features a search bar and buttons for 'UPDATE WEBSITES' and 'ADD LINKS'. Below these is a table listing indexed URLs with columns for Name, View source, View raw text, Download file, Status, and Delete file. The table shows 10 rows of data, all with a status of '✓'. At the bottom, there is a 'Website Connector (1)' section with similar update and add link buttons.

Name	View source	View raw text	Download file	Status	Delete file
